

Software Projects

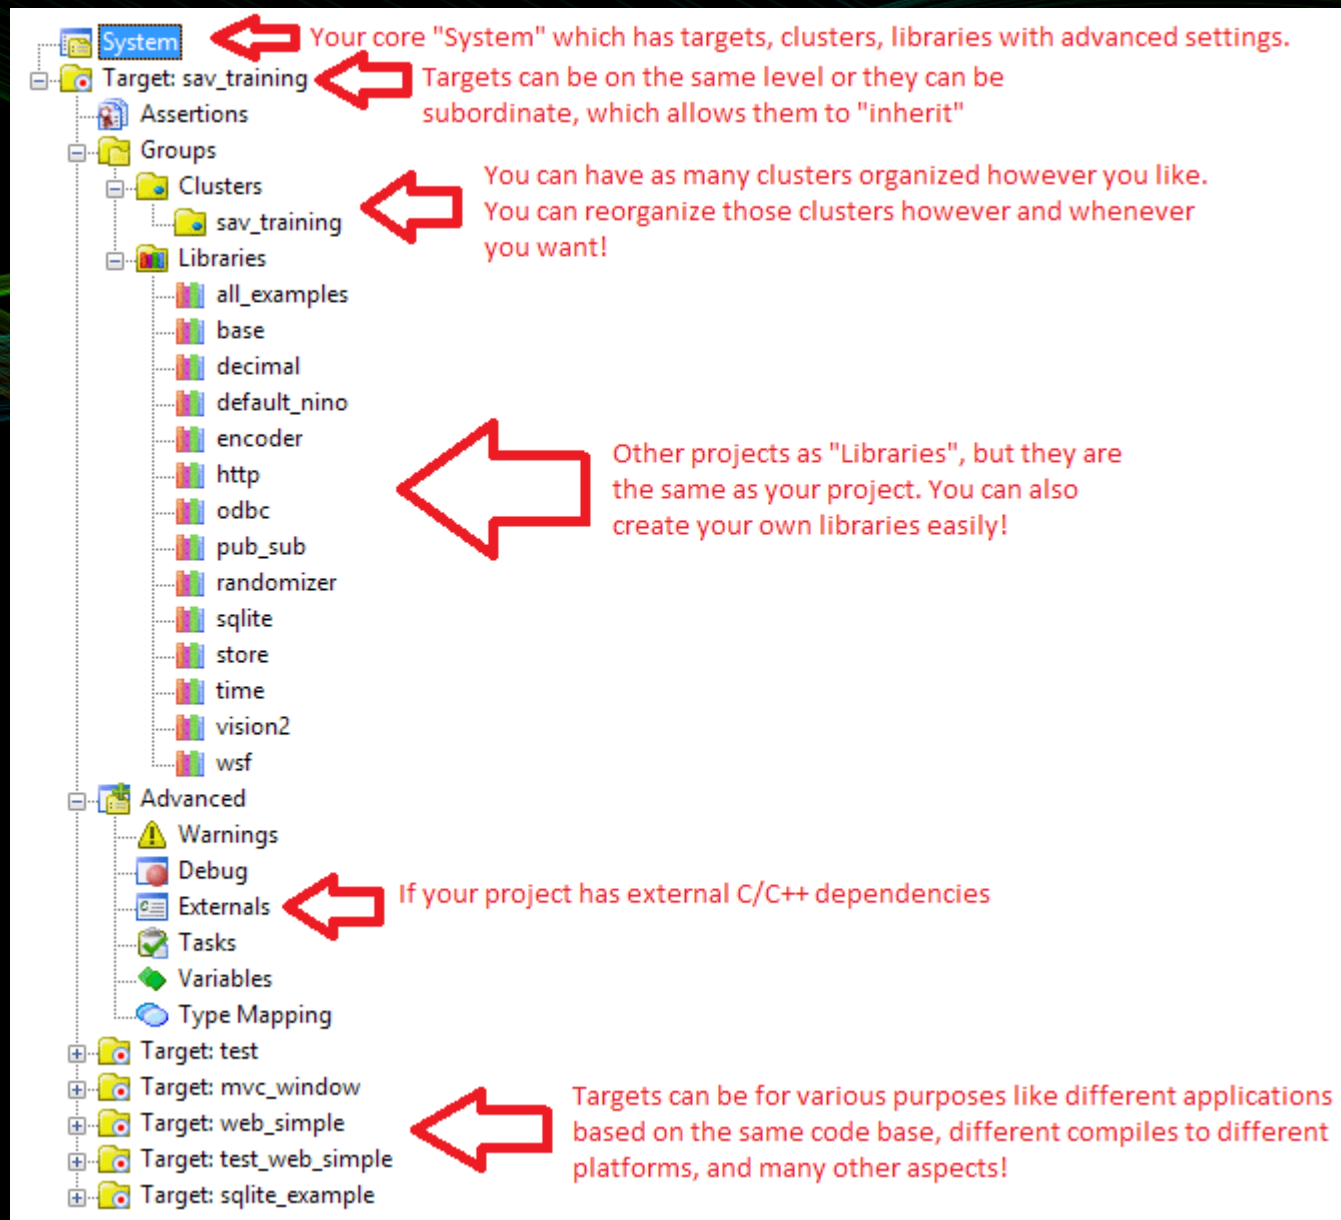

The High-level notion of PROJECT

What is a project?

- A collection of files for a software product
 - Local files (code, specifications, resources)
 - Libraries (code, specifications, resources)
- Every project has a starting point (root)
 - OO → {OBJECT}.feature
 - Process-oriented → {Program} line #1
 - Function-oriented → {Function} line #1
 - Web → “Home” page (index.html)

Etc. ...
